Best Practices for Conducting Faculty Searches

Harvard University is committed to pursuing the benefits of faculty diversity. Recruiting outstanding faculty is essential for keeping the institution productive, creative, competitive, and successful in its mission to train the next generation of scholars and leaders in every field.

Each faculty search provides a chance to attract the broadest talent pool in the identification of future colleagues. Each search also provides a strategic opportunity to reshape the faculty, offering the twin possibilities of enhancing strengths in fields for which we are already distinguished while striking out in new intellectual directions not currently well represented on campus. Recent research in economics, psychology, sociology, and organizational behavior helps us understand better how to do this work.

This guide offers concrete advice and practical strategies for search committee members as they engage in the four major elements of the faculty search process:

1. Initiating an effective and efficient search
2. Actively recruiting a large, excellent, and diverse pool of candidates
3. Ensuring a fair and thorough review of candidates
4. Implementing informative campus visits

Pages 8 and 9 present a special section on the concept of unconscious bias and how to mitigate its effects on candidate evaluations.

This guide is intended to supplement existing School-specific faculty search guidelines and may be customized to suit the needs of individual Schools. For simplicity, we use the term “department” throughout, recognizing that not all Harvard Schools have departments and some use other terms (e.g., areas or units to refer to intellectual subgroups within the School).

Questions or Comments?

Please contact Elizabeth Ancarana, Assistant Provost for Faculty Development and Diversity (elizabeth.ancarana@harvard.edu) or Judith D. Singer, Senior Vice Provost for Faculty Development and Diversity (judith.singer@harvard.edu). We're happy to talk and brainstorm with all faculty members serving on search committees.

1.0 Initiating an Effective and Efficient Search

1.1 The Position Description

Develop a clear position description that includes essential qualifications and experience but don’t make it so specific that it inadvertently deters highly qualified applicants.

- The position description should be as broad as possible, while obviously noting the desired area(s) of scholarship, experience, and disciplinary background. In identifying areas, distinguish between teaching needs and research needs. Narrowly defined searches focused only on specific teaching needs may limit your ability to attract candidates with different profiles who, nonetheless, fully qualify for your position. Because of pipeline issues, narrowly defined searches may also inadvertently exclude highly qualified women or minorities who may not work in specific subfields.

- Avoid characterizing any search as a “replacement” for a departed or retired faculty member. Searches provide an opportunity to look forward, not backwards.

- Think carefully about what’s “required” and what’s “preferred.” Detailed lists of qualifications may deter otherwise qualified candidates from applying. The search committee may consider only those candidates who meet all “required” qualifications.

- Make the advertisement welcoming to all candidates. Barriers to entry, both perceived and real, may deter some of the best candidates from applying. We have learned that advertisements for untenured positions that include superlatives such as "exceptional" or "distinguished" may deter very qualified individuals from applying (because they assume—incorrectly—that they must have already achieved great acclaim). Instead use language that encourages all candidates with strong records and promise to apply.

- Many universities ask prospective job candidates to describe “experience working with and teaching diverse students.” Doing so provides useful information and signals the committee’s interest in recruiting a diverse pool of applicants.

1.2 The Initial Search Plan

Before the search committee is formed, the department—in collaboration with the Dean’s Office—should sketch an initial search plan based on the approved position description.

- To ensure the largest, most diverse pool of candidates, the initial search plan should sketch some outreach activities, including lists of: (1) nominators (potential sources of candidates) and nominees (potential candidates) to be notified; (2) listservs, blogs, and other online venues where the position can be posted; (3) conferences where candidates can be scouted and screening interviews might be conducted; (4) award lists that can be searched for nominees; and (5) venues for advertisements. The initial plan will be modified over time, but it’s wise to have a place to begin.

- Develop a realistic timeline for recruiting and interviewing, working backwards from a target completion date or offer letter date, recognizing that some fields have specific job market periods. Be sure to account for holidays, grading periods, and other times when it will be difficult to get faculty members’ attention.
1.3 The Search Committee

The search committee should include faculty from diverse backgrounds who may have helpful—and divergent—ideas that can enhance efforts to recruit and evaluate candidates. If everyone on the committee thought the same way, a committee of one would suffice. Research shows that committees of individuals with diverse perspectives make better decisions. Pragmatically, it also ensures that issues that will ultimately surface in broader department and School discussions will have been identified and discussed earlier on.

- Include women and minorities on the committee, paying attention to sub-discipline, gender, and race/ethnicity composition. At the same time, be mindful that women and minorities often have greater administrative commitments.

- Consider including faculty from outside your department, especially if you’re searching in a field in which your department lacks deep expertise or that is emerging or interdisciplinary. Harvard faculty from related departments can bring new perspectives to your search. It’s also a great strategy for engaging with colleagues from outside your department over substantive topics of common interest.

- Consider forming a graduate student advisory group to work with the faculty search committee. Graduate students, especially those interested in faculty positions, find this to be a superb experience that gives them insight into the academic job market. Experience shows that graduate students—who are early career themselves—can be especially good at identifying emerging scholars. (If your department has post-doctoral fellows, consider including some of them on the advisory group for the same reasons.)

1.4 Establish Committee Ground Rules

The chair should lead the committee in a discussion of ground rules, including:

- **Decision-making.** Will committee decisions be made by consensus or by voting? If by voting, will absentee votes be allowed? Will votes be open or confidential?

- **Confidentiality.** All search committee members must be sure that they can confidentially share their views with colleagues. Limit casual discussions with colleagues not on the committee about how the search is progressing.

- **The New York Times rule.** Don’t write anything in an email that you wouldn’t want attributed to you on the front page of a major newspaper. Email is great for distributing information but deliberations about candidates should be done in person. Email is not a subtle medium and emails can be forwarded.

- **Recordkeeping.** The committee must keep complete records, including all job advertisements, postings, lists of nominators and nominees, candidate dossiers, rating sheets, long and short lists, and interview notes. The documentation must demonstrate that Harvard has made good faith outreach efforts towards female and minority candidates. We encourage you to use Harvard ARIeS as the system of record.

- **Decorum.** During committee meetings, agree to turn off phones, not read email, and to interact respectfully even through disagreements.
1.5 Dealing with Common Committee Problems

All committee members must be held accountable for everyone's full engagement in the search. Committees work best when all members—not just the chair—are sensitive to group dynamics.

- Group power dynamics can prevent some members from fully participating. Dealing with these dynamics is one of the chair’s primary responsibilities, but it is helpful when other committee members also help draw others into the discussion.

- Beware of committee members who dominate meetings. Once again, this is one of the chair’s primary responsibilities, but the behavior of colleagues is key. Don’t allow any individual to “drive” the search process. The committee, not a single individual (or even pair of individuals), is making all decisions.

- If the committee includes untenured faculty, beware of the undue influence that senior faculty may have, whether purposeful or inadvertent. Untenured faculty may feel uncomfortable expressing views at odds with those of senior colleagues who later will be evaluating them. Periodically, the chair should ask untenured colleagues outside official committee meetings if they have such concerns. If so, the chair can serve as the “official source” of their alternative points of view during committee meetings.

- Beware of resistance to efforts to enhance diversity. Learn how to persuade colleagues to be open to new ideas. (We discuss strategies for doing so in subsequent sections.)

1.6 For Committee Chairs: Running Efficient and Effective Meetings

Committee members must believe that attendance at meetings is important for the success of the search. Respect your colleagues’ time by starting and ending your meetings on schedule. Strive to have all committee members present for all discussions.

- Hold your first meeting well before your application deadline to discuss the ground rules and work of the committee as outlined in Section 1.4. Attend to group dynamics and build rapport among committee members.

- Present an agenda with time allotted to each topic and generally try to stick to the plan. Review the agenda and obtain agreement on agenda items. Keep the committee focused on the agenda and redirect back to it when needed.

- If you deviate from your agenda or run over time, acknowledge it and explain why so that committee members feel that their time was well spent, that the meeting was not a random process, and that they can anticipate useful and well-run meetings in the future.

- At the end of each meeting, assign specific tasks to committee members.

- Before your next meeting, send committee members a written or emailed reminder of their assigned tasks for the next meeting.
2.0 Actively Recruiting a Large, Excellent, and Diverse Pool

2.1 Take Responsibility for Developing a Broad Pool
Candidate recruitment is usually more idiosyncratic and creative than the screening process; committee members are decisive in shaping the pool. Involve all committee members in discussions about pool development.

- Consider giving at least one committee member the task of “pool development”—the responsibility of keeping track of all efforts to develop the broadest pool of applicants.
- Consider asking another committee member to be responsible for ensuring that there is broad outreach designed especially to attract female and minority applicants.
- Foster the engagement of all committee members in matters related to the diversity of the search. Ensuring a diverse pool is the responsibility of every committee member, not just those keeping track of pool development or affirmative action outreach.
- The chair should consult with your School’s Office of Faculty Affairs to learn if there is an affirmation action placement goal for faculty positions at the advertised level. A goal is by no means a quota. But in searches with a placement goal for women or minorities, it is that much more important that the committee conduct robust outreach.

2.2 Examine National Availability Pool Data
Analyze the relevant national pool data. This provides a benchmark for what your pool should look like; if your pool is narrower than the availability data suggests, additional outreach is needed. Your School’s Office for Faculty Affairs should have these data, and many relevant professional societies also distribute related information.

2.3 Examine the Faculty Rosters of Peer Departments
How diverse is your department in comparison to your peers’? Are peer departments more diverse? If so, the committee should discuss why. This exercise is part soul searching but is also important because departments with diverse faculty will, on average, have more diverse graduate student and post-doctoral populations from which to recruit.

2.4 Review the Successes (and Oversights) of Previous Searches
Examine the lists of applicants to the last several searches in your department. Were candidates who have gone on to great success overlooked? Discuss how this might have happened and how this committee can avoid these pitfalls.

2.5 Concrete Strategies for Developing the Applicant Pool You Want
At this stage, your goal is to expand the pool of potential applicants. You want as many candidates to apply as possible. Reaching them and convincing them to apply requires proactive outreach. Sifting and winnowing occurs downstream.

- Develop lists of nominees (potential candidates) and nominators (potential sources for candidates). The larger and more diverse you make these lists, the better.
Potential candidates mentioned early in the process often have a leg up along the way, so ensure that the early lists include women and minorities.

Ask others in your department—including faculty not serving on the search committee and graduate students and postdoctoral fellows not involved with the search—to provide lists of potential nominators and nominees.

Review the editorial boards of journals to identify rising stars. Examine the lists of award winners in the relevant professional societies. Librarians are often happy to help with these tasks.

At conferences, attend some sessions given by younger, up-and-coming researchers whom you may not yet know. Committee members—especially the chair—should attend receptions hosted by special interest groups for female and minority scholars. You may meet potential candidates you might not have considered and the presence of Harvard faculty at these events sends an important signal.

When you read journals, look for articles by scholars you do not yet know.

Identify and consult with institutions (and individuals) that are especially successful at producing female and minority doctoral graduates or post-doctoral fellows in your field. The critical masses found at those institutions often help them continue to become more diverse (at the expense of other institutions).

Consult with colleagues from diverse backgrounds, who are often well positioned to help you reach highly qualified female and minority candidates.

Use your networks, consulting with alumni, visiting committee members, and consortia.

Develop and nurture a talent pipeline. Encourage nominators to identify candidates who are “not quite ready.” Many departments maintain a standing committee that cultivates a diverse slate of potential candidates over time beyond the specifics of any search.

Make sure your department website includes text and images that promote an inclusive environment.

Review directories to identify potential candidates. No multipurpose document like this can identify all the relevant resources. The FD&D website lists many online directories: www.faculty.harvard.edu/FacultySearch. Other ideas can be found on the AAUP website for Diversity and Affirmative Action: www.aaup.org/issues/diversity-affirmative-action.

2.6 Actively Recruit Candidates to Apply

Despite the tight academic job market, the best candidates—the ones you want—have many good options. There may never really have been a time when “post and pray” worked, but it certainly doesn’t work now. Search committee members need to think creatively—and work proactively—to recruit candidates. Many highly qualified candidates have to be invited to apply, especially if they do not see themselves as a natural fit for Harvard, your department, or this specific position. Simply placing ads in the relevant places will not produce the applicant pool you want. A recent study at MIT found that nearly two thirds of
their underrepresented minority faculty members applied to MIT only because they were actively recruited (in comparison to just over one third of majority faculty).

- Email and call nominees directly to invite them to apply. Personal outreach is the single most effective tool for building and diversifying the pool.

- Chairs should actively involve committee members and delegate specific tasks to them. For example, each member should email and then call a certain number of colleagues and ask them to recommend candidates. If the timing works, ask committee members or other faculty to personally contact potential candidates at professional conferences. Make sure you keep track of all individual contacts (who, what, when and where).

- As applications come in, committee members should informally assess who might be missing and follow up with exceptional nominees.

- Avoid making assumptions about candidates; don’t assume anyone is unavailable or unmoving. Circumstances change and with them people’s responses.

- Let the candidate decide whether your department and Harvard is a good fit. Comments from colleagues such as “people from the South never adjust to Boston winters,” “there are no women in the field,” “we never recruit well from the Midwest,” or “she’ll never move because of her husband” can negatively impact your pool.

- Under University guidelines, the committee chair—who has the primary responsibility for ensuring the integrity of the search—can see the confidential individual, self-identified demographic data, including gender, race, and ethnicity, captured in ARieS. Although these confidential data should not be shared with the committee, the chair should evaluate—and help the committee evaluate—whether the search is wide-ranging and thorough, whether the committee identified candidates from diverse populations, and whether everyone is evaluated fully and without bias. The chair should also use this information to encourage diversity in the applicant pool, long list, and short list. But ultimate hiring decisions must be based on qualifications, not demographic characteristics such as gender, race, or ethnicity.

2.7 Advertise in Publications that Target Female and Minority Scholars

Scholars—regardless of gender or ethnicity—tend to look to their field-specific associations, journals, listservs and websites for job postings. But you can enhance your outreach efforts—and reinforce your commitment to diversity—by also advertising in publications affiliated with diversity-focused associations.

Faculty postings on ARieS are automatically posted to the New England HERC and central HERC websites. Many diversity organizations, including those listed on the FD&D website, provide discounts to HERC members (Harvard is the host institution for the New England HERC). The full list of organizations that provide discounts can be found at http://www.hercjobs.org/member_institutions/member_discounts/.
Unconscious Bias and its Influence on Decision Making

What is Unconscious Bias? An enormous body of literature confirms that we all have biases—some explicit, many implicit. Our lifetime experience and cultural history shapes how we evaluate others. Implicit and unconscious assumptions, regardless of gender or race, can affect our decisions, including decisions about faculty hiring. Perhaps most disturbing, implicit biases can be at odds with our own conceptions of ourselves and our conscious values and standards. You may believe yourself to be open-minded and you may be determined to select the most meritorious candidate before you. But a good deal of evidence from the behavioral sciences—some of it conducted on university professors themselves—demonstrates that actual achievements are often set aside in favor of those who fit some group stereotype of those likely to succeed.

Recognizing Your Own Unconscious Biases
Recognizing your biases and those of your colleagues can help reduce their impact on the search. Spending sufficient time on evaluation can also reduce the influence of assumptions that may not be warranted. Understanding our own biases helps minimize their influence on the committee’s deliberations.

Harvard Professor Mahzarin Banaji, Richard Clarke Cabot Professor of Social Ethics in the Department of Psychology in the Faculty of Arts and Sciences, is a leading authority on unconscious bias and its effects on decision making. Search committee members are encouraged to read her recent book: Banaji, MR & Greenwald, AG (2013) Blind Spot: Hidden Biases of Good People. (New York: Delacorte Press). It’s a great read and will change your view of the world.

Take an Implicit Association Test (IAT)
Professor Banaji and colleagues have developed an online set of tasks designed to assess associations between personal attributes (e.g., gender, race, or sexual orientation) and your positive or negative views about them. Project Implicit, hosted at Harvard, includes dozens of IATs that allow you—in the privacy of your office or home—to explore your implicit biases.

We strongly encourage every search committee member to take at least one IAT. (Registration is free, and the first test takes no more than 15 minutes.) The tests are not meant to challenge your conscious attitudes, but to reveal the extent to which you may nevertheless associate groups like “female” with “family” and “male” with “career.” As members of this intellectual community, you will surely find it of some interest to discover that your mind contains associations of which you are unaware. You can find the IATs at implicit.harvard.edu.
Beware of How Unconscious Bias Can Affect Candidate Evaluations

Search committee members often give preference to applicants they know, whose advisors or mentors they know, or who hold a degree from their own alma mater or one of a small number of elite institutions.

- Women, minorities, and candidates from institutions other than traditional peers can be held to higher standards. Search committee members may scrutinize their records in an unconsciously dismissive way, evaluate the same achievements as others to be less important, and fail to notice unexpected achievements.

- Search committee members—and sometimes letter writers—can undervalue contributions by women and minorities, and may unfairly attribute success to mentors and collaborators. It can be helpful to explicitly ask and discuss—as a committee—if a letter writer is unduly shaping a view of a candidate in a positive or negative direction based on scant or unreliable evidence.

- Letters of recommendations often reflect stereotypic views of demographic groups. A man’s research will be described as seminal. A woman will be described as warm and collaborative. Be aware of these implicit cues and work to mitigate their influence on decision making.

- Be especially vigilant about statements concerning “fit.” This euphemism is often used to exclude individuals whose demographic characteristics don’t match the demographics of the department or field. If “fit” were the best driver of decision making, the Harvard of today would be identical to the Harvard of the past.

- Another concept to scrutinize is “potential.” Given that decisions about early career stage scholars often depend upon predictions about potential, don’t let feelings that may come from superficial qualities of candidates such as dress, style of speech, etc., color assessments of actual achievements.

- For women especially, assumptions about family responsibilities—and their potential effect on the candidate’s career path—can negatively influence evaluations, even in the face of evidence of productivity. Here are some excerpts from recent letters of recommendation: “She balances work and life in a way that detracts from her career.” “And what’s more remarkable is that she did all of this while having three children.” [NOTE: the same person who wrote this last sentence also wrote a letter for the candidate’s husband and did not mention the three children, although they were indeed his too.]
3.0 Ensuring a Fair and Thorough Review of Applicants

3.1 Develop Evaluation Criteria

Before reviewing dossiers, the search committee should agree on the criteria to be used to evaluate applicants. Experience shows that without explicit criteria stated up front, evaluators tend to “back into” criteria that support their favored applicants. It’s usually easier to have broad criteria not tied to specific experiences or narrow specialties. Some of the criteria committees typically consider include:

- Scholarly impact
- Research productivity
- Research funding
- Ability to attract and mentor graduate students
- Ability to teach and supervise undergraduates
- Ability to attract, work with, and teach diverse students
- Commitment to collaboration with colleagues
- Relationship to department priorities
- Ability to make a positive contribution to the department’s climate
- Ability to be a conscientious department citizen

In each domain, consider both past accomplishment and future trajectory. Discuss how to weigh the various criteria. Avoid inadvertent reliance on unwritten criteria.

Most committees use a conventional five-point scale to rate applicants: outstanding, excellent, good, fair, and poor (as well as ‘unable to judge’ when insufficient information is available). But even this familiar scale is not sacred. Be flexible as long as everyone agrees with whatever scale is chosen.

3.2 Look for All Exciting Applicants, Even Those “Not Quite Right” for the Current Position

All committee members should look for applicants who may not be ideal for this specific position but who are still attractive as potential faculty members. The committee should discuss and bring all such individuals to the attention of the Dean’s Office.

3.3 Reviewing Dossiers

Reviewing dossiers is time consuming. If the applicant pool is small, all committee members should review all applications. If the pool has hundreds of applicants, the chair should read all applications and assign subsets to each committee member.

- Each applicant should receive a thorough and in-depth review—that includes reading the candidate’s work—from at least two, and preferably more, committee members. If two people are reading each dossier, vary the pairings of committee members with dossiers so that you don’t inadvertently create “mini-committees of two.”

- Committee members must commit to thoroughly reviewing each assigned dossier.

“The faculty search process needs to be comprehensive, fair, and consistently applied.”

Alan M. Garber
Shortcuts invariably lead us to rely on implicit biases. Imagine removing all identifying information from every application and judging each candidate based upon your assessment of the work. You don’t want to make the mistake of overlooking someone later discovered to be outstanding.

- Identify all potentially strong applicants regardless of your own personal preferences. As you read each dossier, imagine how departmental colleagues with different preferences would react to the candidate’s portfolio. What’s attractive to you may not be attractive to them, and vice versa.

- Any use of Google to obtain information on candidates should be judicious and job-related. For example, candidates’ online presence might help assess how active they are in their disciplines. But searches should not be done to elicit information that could not be appropriately obtained directly from a candidate (See Guide to Acceptable Interview Questions, pp. 16-17). And remember that information found through online searches is not always accurate.

### 3.4 Identifying the “Long List” of Credible Candidates

Hold a committee meeting to discuss committee members’ assessments of all applicants; the goal is to generate the “long list.”

- All ratings should be shared—in advance of the meeting—with the committee chair. The chair (or an administrator) should assemble the data in a spreadsheet and present the committee with a sorted list of applicants. The sorting will be “rough” because assigning equal weight to all criteria is rarely best, but having a sorted list will make the committee meeting more efficient.

- The chair should examine the ratings to determine if some committee members assign consistently higher or lower ratings to all applicants. If so, these rater differentials can be taken into account when sorting the list.

- The committee should decide whether the ratings will be shared anonymously or with committee members’ names. Experience shows that discussion will be fuller and more open if assessments are anonymous. Even if anonymous, the chair—who has the responsibility of running the meeting—should know who gave which set of ratings.

- “Long lists” typically have 8 to 10 candidates. Often there is a “natural break” although sometimes the chair will have to set a numerical limit to focus discussion.

- As the committee iterates towards the "long list,” the chair should continually monitor its composition. How diverse is it? Does its representation of women and minorities reflect the applicant pool? The chair and other committee members should periodically ask whether implicit biases may have inadvertently influenced ratings.

---

The “long list” stage is an ideal time to reach out to potential candidates who may not have yet applied and ask if they would submit an application.
• The chair should bring forward female or minority applicants who might deserve a “second look.” Pay special attention to individuals just below the “long list” cutoff. Also look out for applicants who excel on one or two criteria, but not necessarily all.

• Pause and have a second meeting before moving to the “short list” so that all committee members can read—and re-read—all long-listed candidates’ dossiers.

• Although practices vary across Schools, it is wise to have the chair meet with someone external to the committee—preferably from the Dean’s Office—to review the “long list.”

• Ask departmental colleagues to review the “long list” to see whether known strong candidates are missing. This is an ideal time to reach out to potential candidates who may not have yet applied and ask if they would submit an application.

• If the timing works, all “long list” candidates can be interviewed initially at a conference or via Skype to help provide more information that can be used to identify the “short list.” If you do so, all interviews should be conducted in the same format (i.e., in person or via Skype). Section 4.1 describes strategies for developing interview protocols.

3.5 **Identifying the “Short List” of Candidates to be Interviewed**

A strong diverse “short list” is crucial because it is this set of people who will receive intense scrutiny. If the short list isn’t strong, with several credible candidates, the entire search may not be successful. This is a depressing outcome everyone would like to avoid.

Schedule enough time to hold a distinct committee meeting (i.e., separate from the meeting to select the “long list”) to select the “short list” of candidates to come to campus for a visit.

• To ensure a thorough and objective review, the chair should restate the objectives, criteria and ground rules for evaluating candidates, asking members to apply uniform standards in retaining or dropping people. Remind the committee that their faculty colleagues, the Dean’s Office—and in many cases the Provost’s Office—will expect the committee to make a convincing case that the review was equitable and thorough.

• The chair should attend to all women and minorities on the long list. Once again ask if unconscious bias may be playing a role in evaluations.

• Evaluate each candidate’s entire application: don’t rely too heavily on one element such as reference letters or institutional prestige. Keep sufficiently detailed notes so that the reasons for all decisions can be documented clearly.

• Shortlisting more than one woman and minority may help all candidates be more fairly evaluated. Studies show that interviewers evaluate women and minorities more fairly when more than one is interviewed. When only one such candidate is interviewed, he or she is far less likely to succeed than are those in a mixed-gender and mixed-race pool.

• Although practices vary across Schools, it is wise to have the chair meet with someone external to the committee—preferably from the Dean’s Office—to review the “short list” before official invitations to visit are extended.
4.0 Implementing Informative Campus Visits

4.1 Designing an Effective Interview Protocol

Develop interview guidelines that will yield sufficient information for the committee to reach consensus and a persuasive recommendation.

- Develop a common set of questions to ask each candidate. Although most interviews are unstructured in format, all committee members should have a core set of questions that will help them compare candidates.

- Questions might relate to: research experience, teaching experience, teaching interests, publication record, current and future research interests, current funding and potential future funding, ideas for future publications or collaborations, and experience working with diverse populations.

- Feel free to supplement the core list of questions with additional queries customized to each candidate. Remember, you are not only evaluating candidates, you are recruiting them. Asking questions that demonstrate that committee members have read a candidate’s work is essential for projecting respect.

4.2 Planning Campus Visits

Careful planning helps ensure that all candidates have a similar, high quality visit.

- Develop an information packet to share with each candidate, with a detailed schedule identifying the name and affiliation of each person they will meet. Photographs, websites and a map make it easier for candidates to orient themselves before arriving.

- Include a common set of instructions to help candidates prepare for their visit. Common instructions help level the playing field and improve the quality of interactions and talks. This is especially important if some candidates have degrees from programs different from yours (e.g., disciplinary PhD candidates interviewing at Professional Schools; individuals with degrees from one department interviewing for a position in a related but different department). Describe the expectations and decorum of your department’s typical job talk. Are candidates interrupted or do audience members typically wait until the question period? Give candidates a rough sense of the preferred division between a formal presentation and question period. Have a clock in the room so the candidate can monitor his or her pace. Who will moderate the question period: a committee member or the candidate? Who will escort the candidate around campus to meetings and meals?

- All candidates should interact with faculty and students in multiple venues, including talks, individual and group meetings, and meals. Consider a Q&A session with graduate students, “chalk talks,” and other less formal interactions. For candidates in technical fields, consider asking candidates to teach a sample class, so that the research talk need not also serve as a venue for evaluating teaching ability.

- To ensure that each candidate has an equally high quality experience, standardize the schedule as much as possible while also providing opportunities customized for each candidate. Candidates should meet with each person for roughly the same amount of
time. Strive to treat internal and external candidates with consistency. However, if your short list includes alumni, be sure to allow non-alumni to spend more time on campus to become acquainted with people and receive equitable consideration. When possible, all candidates should meet with diverse faculty.

- Have candidates meet people not on the search committee who can provide a broader sense of the faculty experience and resources at Harvard. Graduate students can be excellent ambassadors in this vein, as can members of your School’s Office of Faculty Affairs. The latter can give information about the campus and the community; they can also provide candidates with references and resources they can use to meet their needs and make it easier to raise personal topics with those outside the search committee (e.g., resources for diversity, work-life, benefits, dual-career assistance). Refer candidates to The Office of the Senior Vice Provost for Faculty Development and Diversity website, www.faculty.harvard.edu, which has a wealth of information on these topics.

4.3 Ensuring the Best Possible Campus Visit

Candidates remember campus visits for years to come, sharing their experiences and describing how they were treated. (It is now common for candidates to post descriptions of what happened during their campus visits on blogs and websites. Reading how previous candidates experienced their visit can be sobering.) Remind yourself that candidates are evaluating you and your department as much as you are evaluating them.

- Everyone meeting candidates should review the Guide to Acceptable Interview Questions in the Appendix. Avoid any direct or indirect questions that are impermissible. If a candidate volunteers information on these topics, make no further comments or inquiries, even if they seem harmless.

- All committee members should attend all job talks. Ideally, all voting members of the department should as well. Without consistent attendance, committee members and others may inadvertently give more weight to candidates whose talks they attended.

- Make sure that all job talks are well attended. There is nothing more depressing for a job candidate than a poor turnout or few questions. Enlist graduate students to attend and ask questions (and be sure to solicit their feedback).

- Videotape job talks and ensure that all voting members of the department who are unable to attend the talk watch the video. But make sure that the availability of a video doesn’t decrease attendance at the talk itself.

- Everyone interviewing candidates should behave appropriately and communicate respect for candidates and their time. We have all heard reports of incidents during campus visits that were determinative in “turning a candidate off”—even candidates who were the consensus top choice. Be especially aware of what happens outside the formal interview settings, particularly at meals, when all attendees are less on guard.
• Avoid informal discussions about candidates outside scheduled committee meetings. This allows for independence of thought and the development of diverse perspectives.

• Immediately after each campus visit, the chair (or administrator) should email everyone who interacted with the candidate—even if by just attending the job talk—asking for feedback, preferably on a standardized form. The Appendix presents one School’s sample form. Note that it asks evaluators to explain their sources of data, which gives the committee additional information about how much contact—and how in depth—each evaluation may be.

4.4 Selecting the Preferred Candidate (and Perhaps an Alternate)
Hold a search committee meeting to select a preferred candidate (and perhaps an alternate in the event that the top choice declines).

• By now, the experience of having multiple search committee meetings should set the stage for a productive discussion about the candidates. Review the previous sections of this document that describe best practices for the conduct of search committee meetings, the pernicious effects of implicit biases, and how best to make decisions.

• Beware of placing excessive weight on the job talk. It’s important, but it’s just one slice of an individual’s portfolio and not always the best source of data.

• Committee members should ask hard questions now as these same hard questions will likely surface during the subsequent discussions of the recommendation that take place after the committee has reached its decision and written its report.

4.5 Develop an Initial Mentoring Plan for the New Faculty Member
It’s never too early to start thinking about mentoring. The committee discussions that led to the recommendation for appointment provide a wonderful in-depth review of the individual’s strengths, potential, and areas for improvement.

• Brainstorm strategies that could help the candidate succeed at Harvard if the recommendation to appoint is approved and the candidate decides to come. Ask the committee who will volunteer to serve as a mentor. Who not on the committee should also be approached? Write a proposed mentoring plan into the search report.

• Customized mentoring strategies can provide Harvard with a leg up during recruitment. All prospective new faculty members want to know that Harvard is a place where they can succeed. Proactively developing a mentoring plan sends a strong signal of your department’s commitment.
Guide to Acceptable Interview Questions

It is essential for all members of a search committee to be aware of these guidelines and follow them in both spirit and letter. Avoid any direct or indirect questions that touch on material that may not be asked. This information about an applicant should never be discussed with regard to his or her candidacy for a position.

<table>
<thead>
<tr>
<th>Subject</th>
<th>What May Be Asked</th>
<th>What May NOT Be Asked</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name</td>
<td>Whether the applicant has worked for the University under another name.</td>
<td>Maiden name of a married woman. Inquiries about the name that would seek to elicit information about the candidate’s ancestry or descent.</td>
</tr>
<tr>
<td></td>
<td>Whether any other information, such as a nickname or initials, is needed to check the candidate’s work and educational record.</td>
<td></td>
</tr>
<tr>
<td>Age</td>
<td>Discussion should be kept to questions about the applicant’s career stage.</td>
<td>Inquiry into the date of birth or age of an applicant.</td>
</tr>
<tr>
<td>Gender</td>
<td>No questions.</td>
<td>Inquiry into an applicant’s maiden name or any question that pertains to only one sex.</td>
</tr>
<tr>
<td>Sexual</td>
<td>No questions.</td>
<td>Inquiry into applicant’s sexuality.</td>
</tr>
<tr>
<td>Orientation</td>
<td>No questions.</td>
<td></td>
</tr>
<tr>
<td>Religion</td>
<td>No questions, except in extremely rare and narrow circumstances where religious beliefs and practices could be a <em>bona fide</em> occupational qualification for a position, with the employer bearing a heavy burden to show that this is so.</td>
<td>Inquiry into an applicant’s religious denomination, affiliation, church, parish, pastor, or religious holidays observed. Avoid any questions regarding organizations and/or affiliations that would identify religion.</td>
</tr>
<tr>
<td>Birthplace</td>
<td>No questions.</td>
<td>Birthplace of applicant or of applicant’s parents, partner/significant other, or other close relatives.</td>
</tr>
<tr>
<td>Relatives</td>
<td>Names of applicant’s relatives already employed by Harvard.</td>
<td>Names, addresses, ages, number, or other information concerning applicant’s children or other relatives not employed by Harvard.</td>
</tr>
<tr>
<td>National</td>
<td>An employer may require an employee to produce documentation that evidences his or her identity and employment eligibility under federal immigration laws.</td>
<td>Inquiry into the applicant’s lineage, ancestry, national origin, descent, parentage, or nationality; nationality of parents or partner/significant other; applicant’s native language.</td>
</tr>
<tr>
<td>Origin</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Citizenship</td>
<td>Are you legally authorized to work in the United States?</td>
<td>Inquiries about citizenship or whether the applicant intends to become a U.S. citizen.</td>
</tr>
<tr>
<td>Language</td>
<td>What languages do you read fluently? Write fluently? Speak fluently?</td>
<td>Inquiries into how applicant acquired the ability to read, write, or speak a foreign language.</td>
</tr>
<tr>
<td>Education</td>
<td>Inquiry into the academic, vocational, or professional education of an applicant for employment.</td>
<td>Questions about education designed to determine how old the applicant is.</td>
</tr>
<tr>
<td>Experience</td>
<td>Inquiry into work experience. Inquiry into countries the applicant has visited.</td>
<td>Inquiry into organizations of which the applicant for employment is a member, the nature, name or character of which would likely disclose the applicant’s protected class status.</td>
</tr>
<tr>
<td>Subject</td>
<td>What May Be Asked</td>
<td>What May NOT Be Asked</td>
</tr>
<tr>
<td>------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Disability</td>
<td>You can ask an applicant about his or her ability to perform job-related functions, as long as the questions are not phrased in terms which would elicit whether the applicant has a disability, and as long as such questions are asked of all applicants similarly situated (such as all interviews).</td>
<td>Inquiry into whether the applicant has a physical or mental disability/handicap or about the nature or severity of the disability/handicap. Inquiry into whether an applicant has ever been addicted to illegal drugs or treated for drug abuse/alcoholism. Inquiry into whether an applicant has AIDS. Inquiry into whether an applicant has ever received workers’ compensation. Inquiry into whether an applicant has ever been hospitalized/treated for medical or mental health conditions. Inquiry into whether an applicant has ever been absent from work due to illness. An employer may not inquire as to the nature, severity, treatment, or prognosis of an obvious handicap or disability or of a hidden disability or handicap voluntarily disclosed by applicant.</td>
</tr>
<tr>
<td>Marital Status</td>
<td>No questions.</td>
<td>Are you married? Where does your partner/significant other work? Is there a partner/significant other who would also need to find a job in the area? What are the ages of your children, if any? What was your maiden name?</td>
</tr>
<tr>
<td>Address</td>
<td>Applicant’s place of residence.</td>
<td>Do you rent or own your home? How long at each particular address?</td>
</tr>
<tr>
<td>Height, Weight,</td>
<td>Questions regarding height, weight, or strength may be asked only if the employer can prove these requirements are necessary to do the job.</td>
<td>n/a</td>
</tr>
<tr>
<td>Strength</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Photograph</td>
<td>No questions.</td>
<td>An employer cannot ask for a photograph to accompany an application.</td>
</tr>
<tr>
<td>Military</td>
<td>Applicant’s work experience, including names, addresses of previous employers, dates of employment, reasons for leaving.</td>
<td>Inquiry into an applicant’s type of discharge.</td>
</tr>
<tr>
<td>Criminal Record</td>
<td>Inquiry into actual felony convictions (not arrests) that relate reasonably to fitness to perform a particular job.</td>
<td>Inquiry relating to arrests or misdemeanors. Any inquiry or check into a person’s arrest, court, or conviction record if not substantially related to functions and responsibilities of the prospective employment.</td>
</tr>
<tr>
<td>Memberships</td>
<td>Are you a member of any professional societies or organizations? (Exclude inquiries into specific organizations the name or character of which indicates the race, creed, color, or national origin of its members.)</td>
<td>Inquiry into applicant’s membership in nonprofessional organizations (e.g., clubs, lodges, etc.)</td>
</tr>

Sample Candidate Evaluation Sheet

This evaluation sheet is offered as a general template; search committees should feel free to modify this for their own purposes. These questions are designed for Assistant/Associate Professor faculty searches; committees may want to modify some of the language used for non-ladder and tenured faculty searches.

Candidate’s Name: ____________________________

Please indicate which of the following are true for you (check all that apply):

- ☐ Read candidate’s CV
- ☐ Read candidate’s scholarship
- ☐ Read candidate’s letters of recommendation
- ☐ Attended candidate’s job talk
- ☐ Met with candidate
- ☐ Attended meal with candidate
- ☐ Other (please explain)

Please comment on the candidate’s scholarship (noting the basis of your assessment):

Please comment on the candidate’s teaching ability (noting the basis of your assessment):

Please rate the candidate on each of the following:

<table>
<thead>
<tr>
<th>Potential for (Evidence of) scholarly impact</th>
<th>Excellent</th>
<th>good</th>
<th>neutral</th>
<th>fair</th>
<th>poor</th>
<th>Unable to judge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Potential for (Evidence of) research productivity</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential for (Evidence of) research funding</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential for (Evidence of) collaboration</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Relationship to the department’s priorities</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ability to make a positive contribution to department’s climate</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential (Demonstrated ability) to attract and supervise graduate students</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential (Demonstrated ability) to teach and supervise undergraduates</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential (Demonstrated ability) to attract, work with and teach diverse students</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Potential (Demonstrated ability) to be a conscientious department/School community member</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
